State Comments:

The P.R. Mallory company used this site temporarily (six (6) months), for for repairing dielectric capacitors, placing copper wire into the capacitors and sealing them. PCB oil was used at the site, and contamination of soil near-by is possible. Currently, the site is used as a warehouse by Hi Tek (a division of Lithunia Lighting). The site received a High Priority Assessment. The State recommends that soil samples be taken from the site and analyzed for PCBs, as another P.R. Mallory site was found to have PCBs present in levels up to 100%.
